

PERFORMANCE TEXTILES
for Aviation and Rail Interiors

Where Safety meets Style

At Hainsworth, our knowledge of wool and modern fibres allows Replin by Hainsworth to create fabrics that combine the very best materials with fine craftsmanship, innovation and industry-leading techniques.

Working collaboratively with our aviation and rail customers, we design and manufacture a wide range of interior fabrics, from all types of seating and wall coverings to curtains and blinds.

Replin
BY HAINSWORTH

A close-up, low-angle shot of industrial machinery, likely a textile testing machine. A light-colored fabric sample is held taut between two metal clamps. The machinery features various metal components, including rods, bolts, and a large circular frame. The lighting is dramatic, with strong highlights and deep shadows, emphasizing the textures of the metal and fabric.

Surpassing Standards

Our on-site facilities allow us to carry out quality testing, from concept to completion, ensuring we control a seamless process with absolute attention to detail.

All our fabrics surpass international industry and leading aircraft manufacturers standards, and are rigorously tested in our UKAS accredited laboratory.

Style with Strength

From a strong technological foundation, our industry leading design team work collaboratively with our clients producing intelligent bespoke collections which are precision-engineered to create durable fabrics that meet the exacting requirements of our aviation and rail client partners.

Performance under Pressure

Blending the finest wool with superior, modern yarns, our high-performance fabrics are light-weight yet hard wearing - designed and engineered to enhance the passenger experience.

Hainsworth has delivered innovative textile developments to client partners for over 230 years.

This experience enables Replin by Hainsworth to continue to deliver benefits such as; RFPS (anti-stain finish), Non-Pill (durable woven texture), Self-Adhesive (easy fitting adaption) and Fire-Retardant treatments to help increase the service life of our customers' fleets, delivering excellent, long-term value.
